Education

- University of San Francisco,** Aug 2026 – May 2027
Master of Science in Information Systems
Focus: Product Management, Enterprise Platforms, AI Applications, Data Systems
- University of Toronto,** Sep 2022 – Jun 2026
Honours Bachelor of Science; Double Major in **Cognitive Science & Psychology**
Relevant Coursework: Computer Programming, Data Structures, Statistics, Human-Computer Interaction

Professional Experience

- ML Data Analyst** Apr 2025 – Jun 2026
Temerty Centre for AI Research and Education in Medicine
- Translated clinical, operational, and technical stakeholder needs into **product requirements** for an AI-powered risk-scoring workflow across **30K+ participant records**
 - Prioritized and built an end-to-end ML pipeline in **Python and R**, reducing manual analysis time by **70%**
 - Designed explainability dashboards that translated model outputs into **actionable, decision-ready insights** for clinical and research teams
- Project Lead, Ontario Institute for Studies in Education** Sep 2023 – Jun 2026
- Led the redesign of participant recruitment and scheduling workflows across **100+ sessions**, increasing completion rates by **63%**
 - Built a centralized data and reporting system that reduced inconsistencies by **85%** and created a shared source of truth for team planning
 - Set project priorities, standardized documentation, and scaled workflows as the initiative expanded from an independently led project into a broader team operation
- Imaging Data Analyst, CAMH, Centre for Addiction and Mental Health** Aug 2024 – May 2025
- Redesigned data intake across **200+ fMRI sessions**, collaborating with clinical, technical, and operations stakeholders
 - Translated complex imaging analyses into decision-ready insights for clinical and research stakeholders
 - Drove adoption of new analytical workflows through stakeholder documentation, reporting, and live technical demonstrations
- Research Data Analyst, CAMH, Centre for Addiction and Mental Health** Sep 2023 – Jun 2024
- Coordinated requirements, scheduling, and execution across **60+ patients and 20+ clinical and research team members**
 - Built a centralized tracking and reporting system using **Excel, SQL, R, and Tableau**, reducing coordination errors
 - Standardized documentation and onboarding workflows, improving team handoffs and helping new contributors become productive more quickly

Projects

- HandoffAI: Salesforce-Native Sales Handoff Product** Jul 2026
- Identified recurring CRM handoff gaps—including incomplete context, unclear next steps, and transition risks—and defined requirements for a **Salesforce-native workflow** that transforms Opportunity data into structured account-transition summaries
 - Prioritized an **MVP** around handoff generation, user review, saved history, and export; built the record-page experience using **Lightning Web Components, Apex, SOQL, custom objects, and permission sets**
 - Designed a **human-in-the-loop AI workflow** that lets users review and edit generated outputs before saving, balancing automation with the trust and control required for enterprise adoption
- harmoniQ: CRM Data Readiness Product** 📧, [Live Demo] May 2026
- Mapped the pre-import workflow for **RevOps and Sales Ops teams** and identified high-impact **CRM** failure points, including missing owners, inconsistent fields, invalid values, and routing-breaking data issues
 - Defined and prioritized an MVP around data profiling, explainable risk scoring, recommended fixes, record review, and clean **CSV export**.
 - Built an auditable review-and-export workflow that turns messy operational data into prioritized corrections, choosing transparent recommendations over opaque automatic changes to preserve user control
 - Tested the workflow with five sales and CRM users, using feedback to simplify the review experience and reprioritize missing-context alerts
- Kestrel: AI Career Intelligence System** 📧, [Live Demo] Feb 2026
- Designed an AI decision-support product for job seekers who struggle to translate broad job descriptions into concrete actions
 - Prioritized explainability over a generic chatbot experience by using structured **JSON outputs** and a comparative dashboard that makes recommendations transparent and actionable

Skills

- Product Management:** Product discovery, user needs analysis, requirements definition, MVP scoping, feature prioritization, workflow design, stakeholder management
- Salesforce Platform:** Salesforce CRM, Lightning Web Components, Apex, SOQL, custom objects, permission sets, record pages, workflow automation
- AI Fluency:** LLM applications, AI workflow design, predictive modeling, explainability, data pipelines, analytics
- Technical Skills:** Python, SQL, R, TypeScript, JavaScript, React, Next.js, REST APIs, Git
- Design & Communication:** Figma, Tableau, technical demos, stakeholder presentations
- Languages:** English, Mandarin
